

## List of Classified Information in the competence of the Authority

Seq. No.	Classified Information	Security Classification Level	Area as per Art.1 (...) ... Gov't Reg. No. 216/2004 Coll.	Rationale
1.	International negotiations and their preparation, including international negotiations on contractual documents, if their nature requires this, and international contracts and their performance, if the contracting parties agree to this.	V	(p), (s), (t)	As a consequence of its unauthorised handling, it would harm the interests of legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic.
2.	International negotiations and their preparation, including international negotiations on contractual documents, if their nature requires this, and international contracts and their performance, if the contracting parties agree to this.	D	(p), (s), (t)	As a consequence of its unauthorised handling, it would damage national and public interests, interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
3.	International negotiations and their preparation, including international negotiations on contractual documents, if their nature requires this, and international contracts and their performance, if the contracting parties agree to this.	T	(p), (s), (t)	As a consequence of its unauthorised handling, it would jeopardize interests of the state in the international field, foreign-policy position and security of the contracting parties, relations with friendly governments, and thereby it would result in grave damage to the interests of the Slovak Republic.
4.	International negotiations and their preparation, including international negotiations on contractual documents, if their nature requires this, and international contracts and their performance, if the contracting parties agree to this.	PT	(p), (s), (t)	As a consequence of its unauthorised handling, it would result in serious jeopardy to the maintenance of constitutionality, sovereignty, territorial integrity of the state, and thereby it would cause irreparable and grave damage to the field of defence, security, economic relations, foreign policy or international relations, and thereby it would result in exceptionally grave damage to the interests of the Slovak Republic.
5.	Documentation in the field of defence, protection and security of the state and the protection of	V	(a), (e), (t)	Documentation contains in particular data concerning the understanding of the declaration of war, hostilities, martial law and emergency, performance of tasks in crisis situations outside a time of war and hostilities, and activities of the

	installations			crisis staff of the director of the Authority. Through their disclosure there would occur a disruption in the Authority's activities at the place of its residence, or alternate place, at the time of their declaration, and thereby also weakening the effectiveness of the protection system of classified information, which would harm the interests of legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic.
<b>6.</b>	Selected elements from security documentation on physical and building security of installations and protected areas, selected elements from project documentation compiled for installations and protected areas, and governing acts concerning the protection of classified information	V	(e), (i), (m), (o), (t)	Selected elements from security documentation on physical and building security containing in particular risk evaluation, security and crisis plan of building protection, regime measures and the means of their inspection. Selected elements from project documentation, in particular intrusion detection system and the access control system, containing in particular information on technical security of building protection. Information disclosure from such documentations would result in jeopardizing the building protection system of the Authority and arising its disruption conditions, possible leak of classified information protected by the Slovak republic, and classified information protected according to an international agreement, which would harm the interests of legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic.
<b>7.</b>	Analytical, conceptual and planning materials concerning the protection of classified information	V	(a), (e), (g), (h), (i), (l), (m), (o), (p), (s), (t), (v)	Its unauthorised handling would cause harm to the interests of the Authority, protected by law, which would be disadvantageous to the interests of the Slovak Republic.
<b>8.</b>	Analytical, conceptual and planning materials concerning the protection of classified information	D	(a), (e), (g), (h), (i), (l), (m), (o), (p), (s), (t), (v)	As a consequence of its unauthorised handling, it would damage national interests or interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
<b>9.</b>	Analytical, conceptual and planning materials concerning the protection of classified information	T	(a), (e), (g), (h), (i), (l), (m), (o), (p), (s), (t), (v)	As a consequence of its unauthorised handling, it would jeopardize foreign policy position, security and interests of the Slovak republic in the international sphere, and thereby it would result in grave damage to the interests of the Slovak republic.
<b>10.</b>	Agreements and cooperation with the armed forces, armed security corps, armed corps and the Slovak Information Service.	V	(t)	Cooperation of the Authority with bodies of the state administration in particular with the Ministry of the Interior of the Slovak republic, the Ministry of Defence of the Slovak republic and the Slovak Information Service, from which it requests the provision of source documents and information gained in

				the framework of their competence. Selected data from the results of mutual cooperation have the nature of classified information. Their disclosure would reveal forms, methods and means used by cooperating parties, or impinge upon the rights of third parties and cause harm to the interests of cooperating parties, protected by law, state interests, and which would be disadvantageous to the interests of the Slovak Republic.
<b>11.</b>	Agreements and cooperation with the armed forces, armed security corps, armed corps and the Slovak Information Service.	D	(i), (t)	Cooperation in forestalling and removing security risks with bodies of the state administration in particular with the Ministry of the Interior of the Slovak republic, the Ministry of Defence of the Slovak republic and the Slovak Information Service, from which it requests the provision of source documents and information gained in the framework of their competence. Selected data from the results of mutual cooperation have the nature of classified information. Their disclosure would reveal forms, methods and means used by cooperating parties, or impinge upon the rights of third parties and cause harm to the interests of cooperating parties, protected by law, state interests, and which would result in simple damage to the interests of the Slovak Republic.
<b>12.</b>	Negotiation, the content of which is classified information and related documentation.	V	(a) to (v)	Its unauthorised handling would cause harm to the interests of the Authority, protected by law, which would be disadvantageous to the interests of the Slovak Republic.
<b>13.</b>	Negotiation, the content of which is classified information and related documentation.	D	(a) to (v)	As a consequence of its unauthorised handling, it would damage national interests or interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
<b>14.</b>	Negotiation, the content of which is classified information and related documentation.	T	(a) to (v)	As a consequence of its unauthorised handling, it would jeopardize foreign policy position, security and interests of the Slovak republic in the international sphere, and thereby it would result in grave damage to the interests of the Slovak republic.
<b>15.</b>	Negotiation, the content of which is classified information and related documentation.	PT	(a) to (v)	As a consequence of its unauthorised handling, it would result in serious jeopardy to the maintenance of constitutionality, sovereignty, territorial integrity of the state, or it would cause irreparable and grave damage to the field of defence, security, economic relations, foreign policy or international

				relations, and thereby it would result in exceptionally grave damage to the interests of the Slovak Republic.
<b>16.</b>	Security file of a nominee or security file of an entrepreneur.	V	(i)	Its unauthorised handling would cause harm to the interests of a nominee or entrepreneur, protected by law, which would be disadvantageous to the interests of the Slovak Republic. (In case, a security file is marked with a higher security classification, the file shall be marked with the higher security classification).
<b>17.</b>	Selected date and documentation of organization, form, means, results of the internal protection section activities of the Authority and the means of its classification.	V	(i)	Selected data from these activities and their documentation is to be classified due to ensuring their unbiased performance, and the results from these activities are to be protected from abuse of their objective investigation, documentation and subsequent objective evaluation and imposition of appropriate measures directed to the improvement of effectiveness of the classified information protection within the Authority. Disclosure of these data would cause harm to the interests of legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic.
<b>18.</b>	Information systems connected with personnel security and industrial security.	V	(i), (m)	Unauthorised handling of information system would cause harm to the interests of legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic. (In case, the information system is certificated on higher level of security classification, it shall be marked with the higher security classification accordingly.)
<b>19.</b>	Summary lists of persons who have been issued a security clearance certificate and selected data of persons who have been issued a security certificate.	D	(i)	Disclosure of the mentioned data may make available specific data of persons on their affiliation to security units, including the intelligence services, with a direct impact on the fulfilment of designated tasks from the side of these persons. It would result in damage to national and public interests, interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
<b>20.</b>	Summary data and documentation of means of the protection of information classified Prísne tajné a Tajné	T	(o)	As a consequence of unauthorised handling of the mentioned data, it would jeopardize defence, security and interests of the Slovak republic in the international and economic sphere, and thereby it would result in grave damage to the interests of the Slovak republic.
<b>21.</b>	Summary data and documentation of means on the protection of information classified Dôverné and Vyhradené, and selected data	D	(o)	As a consequence of unauthorised handling of the mentioned data, it would jeopardize national and public interests, interests of a body of the state administration protected by law, and thereby it would result in simple damage

	and documents on means of the protection of information classified Prísne tajné and Tajné.			to the interests of the Slovak Republic.
22.	Selected data and documents on means of the protection of information classified Dôverné and Vyhradené.	V	(o)	Unauthorised handling of the mentioned data would cause harm to the interests of a body of the state administration, legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic.
23.	Cryptographic materials and summary data concerning research, development, production, protection, operation, key management, cryptographic materials, and network topologies of systems and means of the cryptographic protection of information designated for the protection of information classified Prísne tajné.	PT	(o)	As a consequence of unauthorised handling of the mentioned data, it would seriously jeopardize the maintenance of constitutionality, sovereignty, territorial integrity of the state, or it would cause irreparable and grave damage to the field of defence, security, economic relations, foreign policy or international relations, and thereby it would result in exceptionally grave damage to the interests of the Slovak Republic.
24.	Partial data concerning research, development, production, protection, operation, key management, cryptographic materials, and network topologies of systems and means of the cryptographic protection of information designated for the protection of information classified Prísne tajné.	T	(o)	As a consequence of unauthorised handling of the mentioned data, it would jeopardize defence, security and interests of the Slovak republic in the international and economic sphere, and thereby it would result in grave damage to the interests of the Slovak republic.
25.	Cryptographic materials and summary data concerning research, development, protection, operation, key management, cryptographic materials, and network topologies of systems and means of the cryptographic protection of information designated for protection of information classified Tajné.	T	(o)	As a consequence of unauthorised handling of the mentioned data, it would jeopardize defence, security and interests of the Slovak republic in the international and economic sphere, and thereby it would result in grave damage to the interests of the Slovak republic.
26.	Partial data concerning research,	D	(o)	As a consequence of unauthorised handling of the mentioned data, it would

	development, production, protection, operation, key management, cryptographic materials, and network topologies of systems and means of the cryptographic protection of information designated for the protection of information classified Tajné.			jeopardize national and public interests, interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
27.	Summary data concerning research, development, protection, operation, key management, cryptographic materials, and network topologies of systems and means of the cryptographic protection of information designated for protection of information classified Dôverné and Vyhradené.	D	(o)	As a consequence of unauthorised handling of the mentioned data, it would jeopardize national and public interests, interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
28.	Partial data concerning research, development, production, protection, operation, key management, cryptographic materials, and network topologies of systems and means of the cryptographic protection of information designated for the protection of information classified Dôverné and Vyhradené.	V	(o)	Unauthorised handling of the mentioned data would cause harm to the interests of a body of the state administration, legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic.
29.	Summary data concerning research and development in the field of cryptology, summary data on special forms and methods of cryptology used in the cryptographic protection of information.	T	(o)	As a consequence of unauthorised handling of the mentioned data, it would jeopardize defence, security and interests of the Slovak republic in the international and economic sphere, and thereby it would result in grave damage to the interests of the Slovak republic.
30.	Partial data concerning research and development in the field of cryptology, partial data on special forms and methods of cryptology used in the cryptographic protection of information, cryptologic and security analyses of systems and means of the cryptographic protection of information.	D	(o)	As a consequence of unauthorised handling of the mentioned data, it would harm national and public interests, interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.

<b>31.</b>	Security standards for the field of the cryptographic protection of information and for the protection against unintentional electromagnetic emissions of technical devices and devices for the cryptographic protection of information.	D	(o)	As a consequence of unauthorised handling of the mentioned data, it would harm national and public interests, interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
<b>32.</b>	Documentation for proposals for the approval of means of the cryptographic protection of information into operation to protect information classified Prísne tajné and rules and regulations for using such means.	D	(o)	As a consequence of unauthorised handling of the mentioned data, it would harm national and public interests, interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
<b>33.</b>	Documentation for proposals for the approval of means of the cryptographic protection of information into operation to protect information classified Tajné, Dôverné and Vyhradené, and rules and regulations for using such means.	V	(o)	Unauthorised handling of the mentioned data would cause harm to the interests of a body of the state administration, legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic.
<b>34.</b>	Principles of the cryptographic protection of information, information system of the cryptographic protection of information.	D	(o)	As a consequence of unauthorised handling of the mentioned data, it would jeopardize national and public interests, interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
<b>35.</b>	The organisation and securing classified governmental and foreign links by the cryptographic protection of transferred information; the classified network configuration.	D	(a)	As a consequence of unauthorised handling of the mentioned data, it would jeopardize national and public interests, interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
<b>36.</b>	Records connected with the cryptographic protection of information.	V	(o)	Unauthorised handling of the mentioned data would cause harm to the interests of a body of the state administration, legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic
<b>37.</b>	Records and selected accountable records connected with the cryptographic protection	V	(i), (o)	Unauthorised handling of the mentioned data would cause harm to the interests of a body of the state administration, legal entities or individuals, protected by

	of information.			law, which would be disadvantageous to the interests of the Slovak Republic
<b>38.</b>	Security documentation of technical devices for the security classification level Dôverné and Vyhradené.	V	(m), (o)	Unauthorised handling of the mentioned data would cause harm to the interests of a body of the state administration, legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic
<b>39.</b>	Security documentation of technical devices for the security classification level Prísne tajné and Tajné	D	(m), (o)	Disclosure of information included in the mentioned documents would harm the interests of a body of state administration, protected by law, and thereby it would simply harm the interests of the Slovak Republic.
<b>40.</b>	The results of vulnerability evaluations and penetrating tests of technical devices for the security classification level Dôverné and Vyhradené.	V	(i)	Unauthorised handling of the mentioned data would cause harm to the interests of a body of the state administration, legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic
<b>41.</b>	The results of vulnerability evaluations and penetrating tests of technical devices for the security classification level Prísne tajné and Dôverné.	D	(i)	As a consequence of unauthorised handling of the mentioned data, it would harm national and public interests, interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
<b>42.</b>	Selected security standards for the field of technical devices security.	V	(o)	Unauthorised handling of the mentioned data would cause harm to the interests of a body of the state administration, legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic.
<b>43.</b>	Selected accreditation declaration on compliance of NATO and EU communication and information systems.	V	(o)	Unauthorised handling of the mentioned data would cause harm to the interests of a body of the state administration, legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic.
<b>44.</b>	Security standards for the field of the cryptographic protection of information and for the protection against unintentional electromagnetic emissions of technical devices and devices for the cryptographic protection of information.	V	(o)	As a consequence of unauthorised handling of the mentioned data and information, it would cause harm to the interests of a body of the state administration, legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic.
<b>45.</b>	Selected information and documents connected with providing the protection against unintentional electromagnetic radiation.	V	(m), (o)	As a consequence of unauthorised handling of the mentioned data and information, it would cause harm to the interests of a body of the state administration, legal entities or individuals, protected by law, which would be disadvantageous to the interests of the Slovak Republic.

46.	Selected information and documentation connected with providing the protection against unintentional electromagnetic radiation.	D	(m), (o)	As a consequence of unauthorised handling of the mentioned data and information, it would harm national and public interests, interests of a body of the state administration protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
47.	Contracts and agreements with the integrator and main subcontractors for designing, implementation and operating the Backbone for transmission of classified information (hereinafter as "NS PUI").	T	(m)	The most important matters concerning the subject of designing and implementation of the Backbone, terms of its realizations and the means of financing each phase. The Backbone will be interconnected with state departments on the national level, and with EU and NATO on the international level. As a consequence of unauthorised handling of the subject of the contracts and agreements, it would jeopardize interests of the state and the parties, with the impact on the obligations at national and international level, and thereby it would result in grave damage to the interests of the Slovak Republic.
48.	Contracts and agreements with subcontractors for designing, implementation, and operating NS PUI.	D	(m)	Contracts and Agreements with subcontractors are the integral part of the whole process of the designing, implementation, and operation the Backbone. As a consequence of unauthorised handling of these documents, it would disrupt performance of planned tasks of the mentioned process, and it would result in harm to national and public interests, interests of a body of the state administration, protected by law, and thereby it would result in simple damage to the interests of the Slovak Republic.
49.	Contracts and agreements with co-operators for designing, implementation, and operating NS PUI.	V	(m)	Common cooperation with the professional workplaces will be organized with the aim to provide required quality of works in connection with the design, implementation, and operation the Backbone. Unauthorised handling of the mentioned contracts and agreements would result in harm to the interests of the parties, protected by law, and in particular of the Authority, as the sponsor of the Backbone, which would be disadvantageous to the interests of the Slovak Republic.
50.	Project documentation of NS PUI system.	T	(m)	Documents concerning the projection activities of the Backbone system in all phases of the projection. As a consequence of unauthorised handling of the subject of the documentation, it would jeopardize interests of the state and the parties, with the impact on the obligations at national and international level, and thereby it would result in grave damage to the interests of the Slovak Republic.

				Republic.
<b>51.</b>	Project documentation of NS PUI sub-systems.	D	(m)	Documents concerning the projecting activities of sub-systems of the Backbone in all phases of projecting. As a consequence of unauthorised handling of the documentation, it would harm the interests of a body of the state administration, and thereby it would result in simple damage to the interests of the Slovak Republic.
<b>52.</b>	Project documentation of NS PUI elements.	V	(m)	Documents concerning the projection activities of the Backbone elements in all phases of the projection. Unauthorised handling of the documents would cause harm to the interests of the parties, protected by law, and in particular of the Authority, as the sponsor of the Backbone, which would be disadvantageous to the interests of the Slovak Republic.
<b>53.</b>	Managing system acts on NS PUI.	T	(m), (o)	Documents concerning the managing process of projecting, implementation, and operation the Backbone at the highest managing level with the emphasis on main acts, in particular the planning and assessing ones. As a consequence of unauthorised handling of the subject of the documentation, it would jeopardize the interests of the state, and thereby it would result in grave damage to the interests of the Slovak Republic.
<b>54.</b>	Managing, organizational, managerial acts on NS PUI.	D	(m), (o)	Documents concerning the management process of projecting, implementation, and operation the Backbone at level of managerial experience - in particular commissions, decisions, inspections. As a consequence of unauthorised handling of the documentation, it would harm the interests of a body of the state administration, and thereby it would result in simple damage to the interests of the Slovak Republic.
<b>55.</b>	Managing acts at the working level of NS PUI.	V	(m), (o)	Documents concerning the management process of projecting, implementation, and operation the Backbone at the level of common operative activities – in particular meetings, methodical directions. Unauthorised handling of the documents would cause harm to the interests of the parties, protected by law, and in particular of the Authority, as the sponsor of the Backbone, which would be disadvantageous to the interests of the Slovak Republic.
<b>56.</b>	Operating documentation of NS PUI system.	T	(m), (o)	Documentation related to recovery, testing, inspection, training, technical signature, manuals, instructions for use and maintenance of the Backbone system. As a consequence of unauthorised handling of the subject of the documentation, it would jeopardize the interests of the state, and thereby it

				would result in grave damage to the interests of the Slovak Republic.
<b>57.</b>	Operating documentation of NS PUI subsystems, its control and communication software.	D	(m), (o)	Documentation related to recovery, testing, inspection, training, technical signature, manuals, instructions for use and maintenance of the Backbone subsystems. As a consequence of unauthorised handling of the documentation, it would harm the interests of a body of the state administration, and thereby it would result in simple damage to the interests of the Slovak Republic.
<b>58.</b>	Operating documentation of NS PUI elements, its hardware and software configuration.	V	(m), (o)	Documentation related to recovery, testing, inspection, training, technical signature, manuals, instructions for use and maintenance of the Backbone elements. Unauthorised handling of the documents would cause harm to the interests of the parties, protected by law, and in particular of the Authority, as the sponsor of the Backbone, which would be disadvantageous to the interests of the Slovak Republic.
